

Lake Seminole Project Update:

Construction of the Lake Seminole Stormwater Improvement Project:

May 21, 2008

The project includes the construction of stormwater treatment facilities at the north end of Lake Seminole. Access to the construction site will be through Tradewinds Blvd (See Figures 1-2). Construction activities will occur between 7 a.m. and 7 p.m. Monday - Friday. No construction activities will occur during the weekends. No access to the site will be permitted for the duration of the project due to safety concerns. The project web site <http://www.pinellascounty.org/LakeSeminole> will be updated regularly with aerial photography of the construction for all interested citizens.

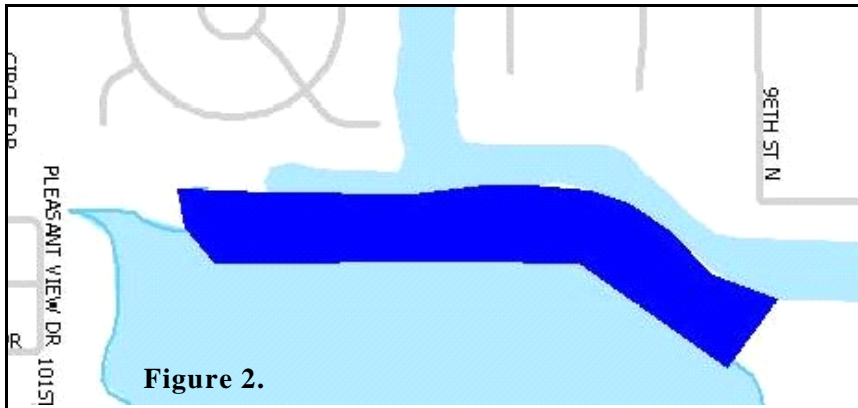

Figure 2.

Figure 3.

Please Note

1. The NW canal entering Lake Seminole will not be accessible to boats when construction begins (See Figure 3). All efforts will be made to complete that stage of the construction in a timely manner to restore access.
2. Tradewinds Blvd: Please do not park on the street Monday - Friday between 7 a.m. and 7 p.m. Please ensure that visitors and service providers park in driveways to avoid traffic problems.
